PRIVATE · FOR GANESH

Demo playbook

What to prepare, show, say, avoid, and ask.

Matches the product at commit f482cfe · sample files in demo/sample-files

> **Goal of the meeting**
>
> Not a signature. Learn their real monthly pain, get 50–100 real invoices to test on, and agree a dated next step.

1. Before the meeting

✓	Task	How
☐	Database up to date	cd backend && .venv/bin/alembic upgrade head
☐	Start the app	./run.sh → http://localhost:3000
☐	Fresh account	Register your firm; Settings → Workspaces → create "Tapi Fabrics Pvt Ltd"; open it
☐	AI for Q&A (optional)	Settings → AI providers: add a key. Without one, skip step 8
☐	Files ready	demo/sample-files (keep the annual report for step 8)
☐	Present from PDF	demo/KnowledgeHub-AI-Demo.pdf (fonts embedded); PPTX as backup
☐	Rehearse + record	Run steps 1–9 once (≈12 min); screen-record as a backup

2. Meeting plan (25 minutes)

Time	What	Notes
0–5	Ask first (section 6)	Before showing anything; write answers down
5–17	Demo (section 3)	Use their words from the questions
17–22	Roadmap + pilot (slides 14–15)	Ask them to rank the roadmap
22–25	Next step	Date to receive invoices, who sends them, when you show results

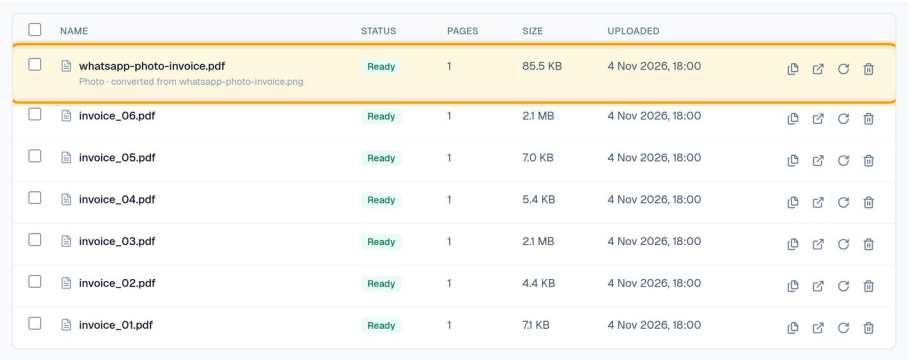

3. Demo script

Order matters: approve invoice_03 BEFORE setting up the client rules (step 5 before step 6), otherwise it is flagged as billed to another client.

Step 1 · Upload

Do Documents → drag in invoice_01...06 and whatsapp-photo-invoice.png. Wait for Ready.

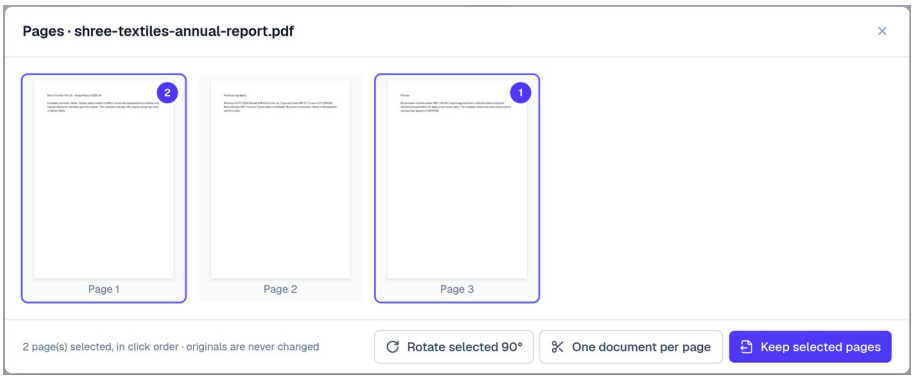

Say *"Bills come as PDFs, scans and WhatsApp photos. All of them go in here, and scans are read automatically."*

Step 2 · PDF tools

Do Pages icon on any PDF: click pages, show 'One document per page'. Tick two invoices → Merge.

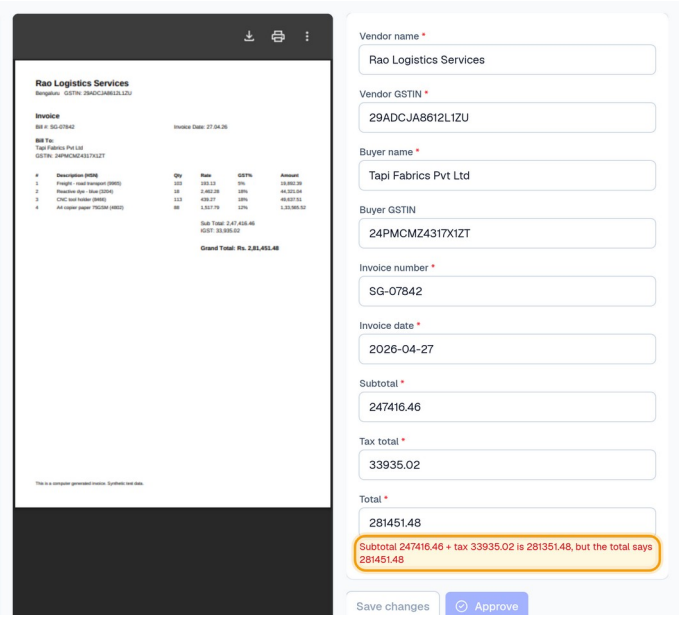

Say *"A vendor sends 20 bills in one PDF? One click, 20 invoices. No other PDF software."*

Step 3 · Wrong total

Do Review → Extract new → open invoice_05.

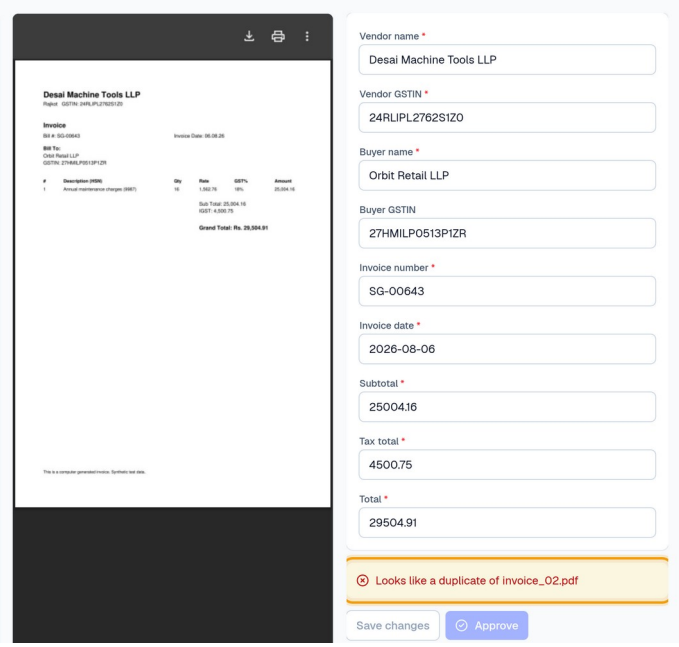

Say *"The bill doesn't add up: ₹100 off. Your team would only find this later, if at all."*

Step 4 · Duplicate photo

Do Open whatsapp-photo-invoice.pdf.

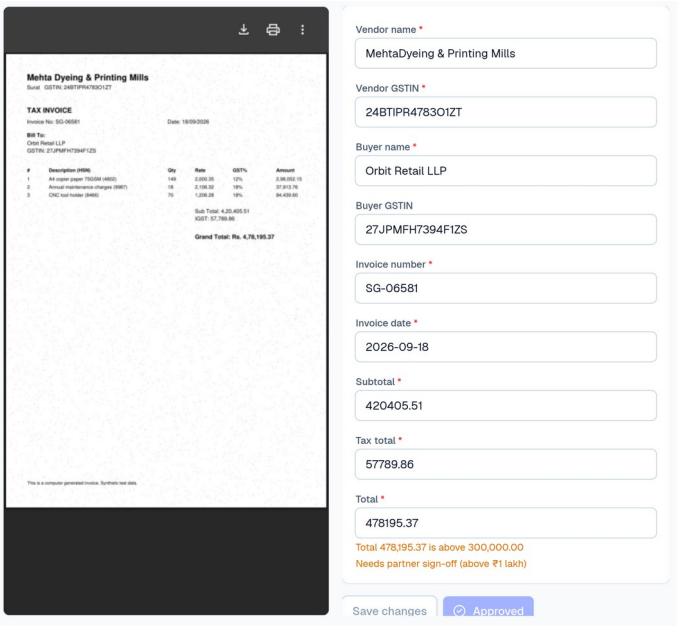

Say *"The client sent the same bill as PDF and as a photo. Caught, and approval is blocked."*

Step 5 · Fix, approve, Excel

Do Open invoice_03 (scan). Fix anything misread (e.g. vendor name). Approve → Excel.

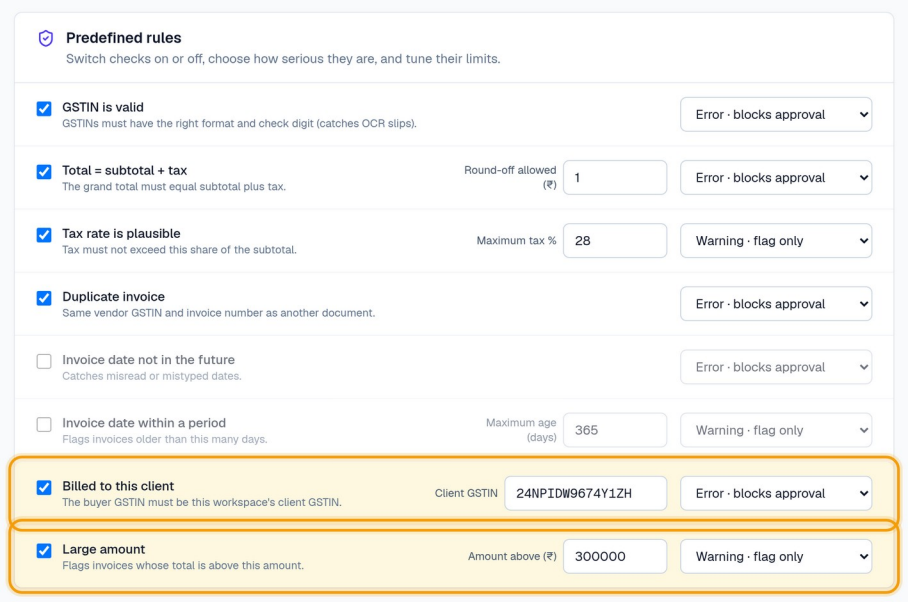

Say *"Nothing leaves without approval, and every correction is recorded. Today Excel; Tally next."*

Step 6 · Client rules

Do Rules → tick 'Billed to this client', GSTIN 24NPIDW9674Y1ZH; tick 'Large amount'; add their own custom rule. Save.

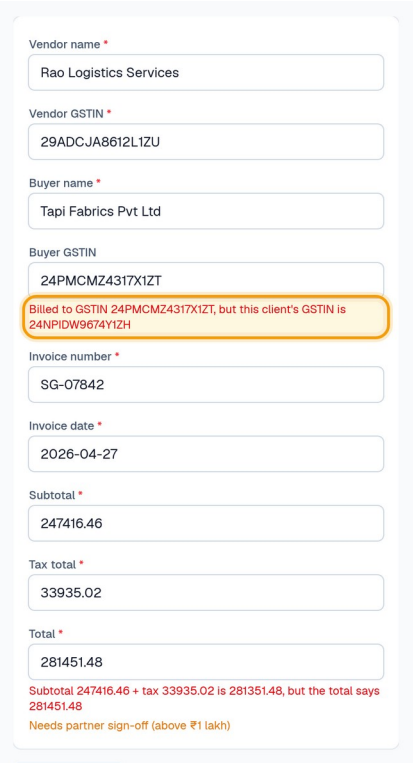

Say *"What's one check your seniors always do? Let's add it now."*

Step 7 · Wrong client GSTIN

Do Review → invoice_05.

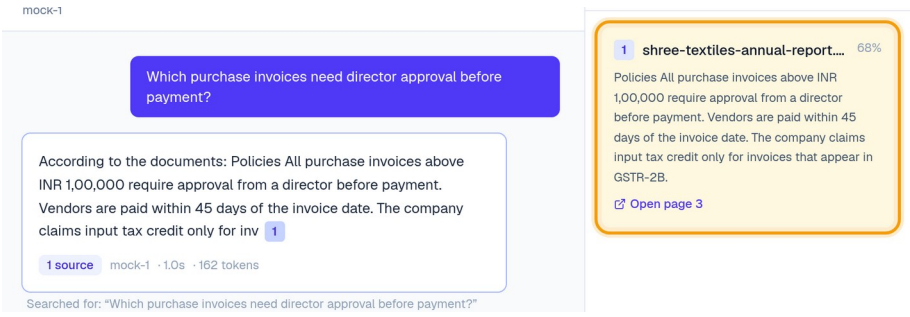

Say *"Right name, wrong GSTIN: credit isn't claimable. Flagged automatically."*

Step 8 · Ask the documents

Do Upload shree-textiles-annual-report.pdf. Research → Start conversation → "Which purchase invoices need director approval before payment?" → click [1].

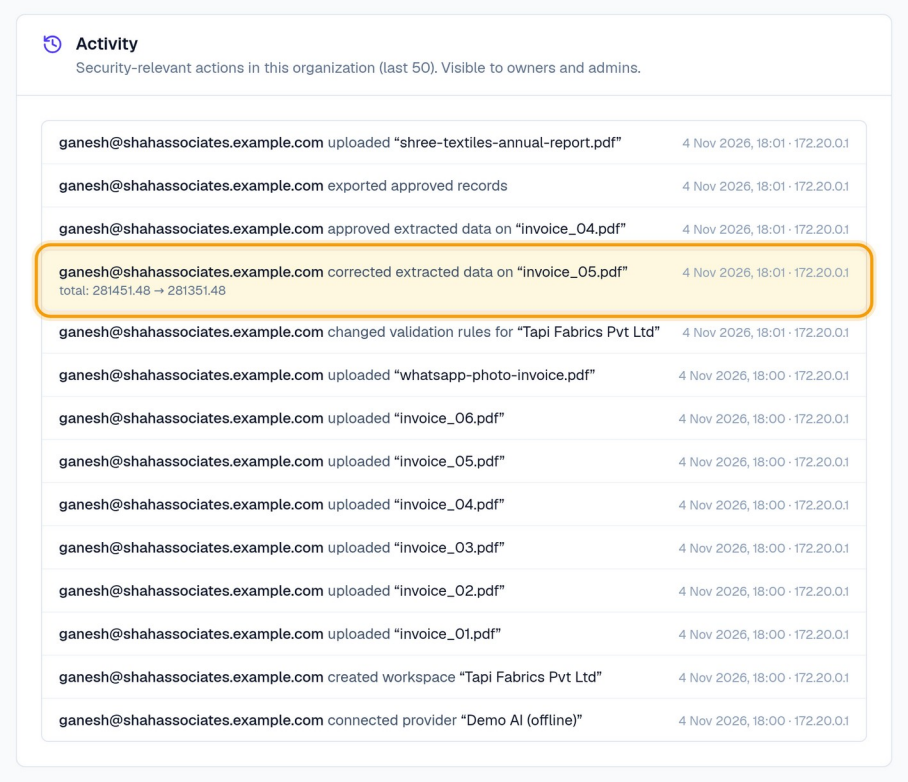

Say *"Answers only from the client's documents, with the page."*

Step 9 · Trust

Do Settings → Activity.

Say *"Who changed which figure, when and from where."*

4. What NOT to claim

Don't claim	Reality today	Say instead
It catches wrong GST	Only the total and overall tax %. invoice_04 has a wrong GST amount that is NOT flagged. Don't open invoice_04.	Line-item and GST-rate checks are next.
It posts to Tally	Excel only.	Tally export is next; we'd build it with you.
It does GSTR-2B	Not built.	Would 2B matching save you more time than Tally export?
98% accurate	Measured only on generated invoices.	Let's measure it on your invoices.
Works on any photo	JPG/PNG yes, iPhone HEIC no; poor photos read worse.	Send real photos; we'll show you.

5. Objections

They say	You answer
Is our data safe?	Each firm and client fully separated (tested), every action logged, keys encrypted. No formal certification yet: don't claim one.
We already use Tally.	We don't replace Tally. We give you checked data before it goes in; Tally export is next.
What if it misreads?	That's why there's review: nothing is exported until a person approves, and every fix is recorded.
We tried Suvit / others.	Ask what they liked and why they stopped. Our angle: rules per client, full audit trail, local support.
How much?	Free pilot for founding firms; pricing after we prove time saved on your data.

6. Ask BEFORE the demo

#	Question	Their answer
1	Walk me through last month's GSTR-3B filing for one client.	
2	Which step took longest? Who did it?	
3	When did something last go wrong? What did it cost?	
4	What have you tried to fix that?	
5	How do purchase bills get into Tally today? How long per client?	
6	Do clients send bills on WhatsApp?	
7	Which tools have you tried (Suvit, others)? Why stop or stay?	
8	Can we test on 50–100 of your invoices?	

7. After the meeting

- Log the conversation in docs/CA-pain-discovery.md and update the hypothesis tally.
- Send a thank-you message the same day, with the agreed next step and the Overview document.
- If they share invoices: run them, note every wrong field, measure real accuracy.
