FOR CA FIRMS · SURAT

Client bills in.
Checked data out.

KnowledgeHub AI reads your clients' invoices, checks them against your rules, and gives your team a review screen where nothing goes out unapproved.

Ganesh Rajput · KnowledgeHub AI

THE MONTH-END REALITY

Every month, for every client

What we hear from CA offices:

1

Bills arrive everywhere

WhatsApp photos, emails, PDFs and paper, often at month-end.

2

Typed in by hand

Vendor, GSTIN, invoice number, amounts: client after client.

3

Mistakes found late

Wrong totals, invalid GSTINs, the same bill entered twice.

4

Deadlines don't move

GSTR-1 on the 11th, GSTR-3B on the 20th, and no trail of who changed what.

Question for you: how many hours did your team spend on purchase bills last month?

HOW IT WORKS

One flow, inside one platform

Each client is a separate workspace. Originals are never changed. Every action is recorded.

01
Upload
PDFs, scans, WhatsApp photos, merge & split

02
Read
OCR + invoice reader

03
Check
Your rules, per client

04
Review
Fix anything, every change logged

05
Approve
Nothing leaves unchecked

06
Export
Excel today, Tally next

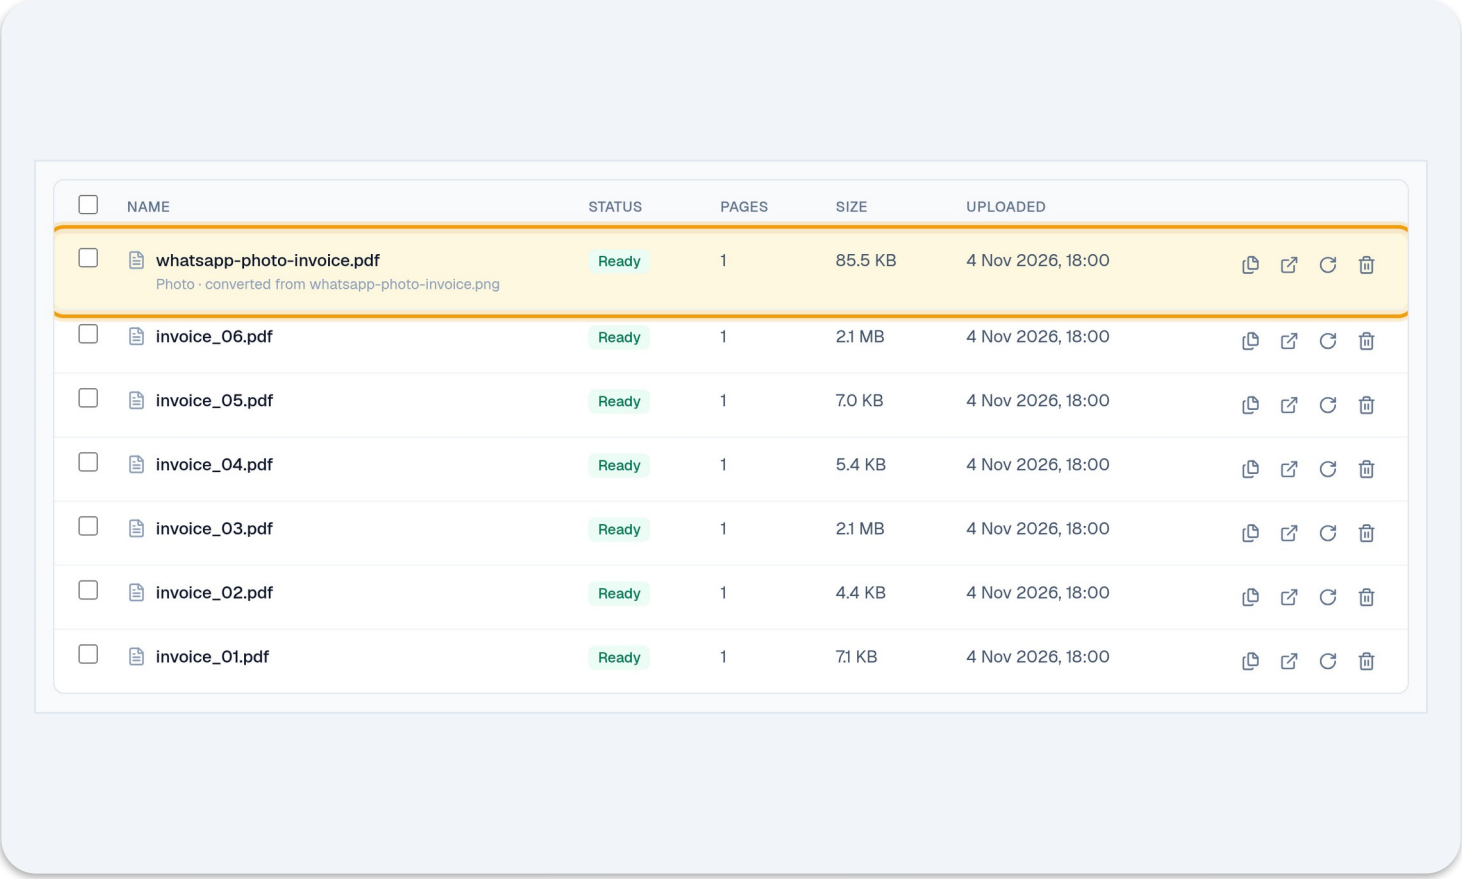

Plus: ask questions across a client's documents; every answer shows its source page.

Check and Review are where we're different: your rules decide what gets flagged, and every correction is recorded.

UPLOAD

Upload anything, even WhatsApp photos

Photos become upright PDFs and are read automatically.

PDFs, scans, DOCX, phone photos

JPG / PNG straight from WhatsApp

Read automatically

OCR runs on our own servers

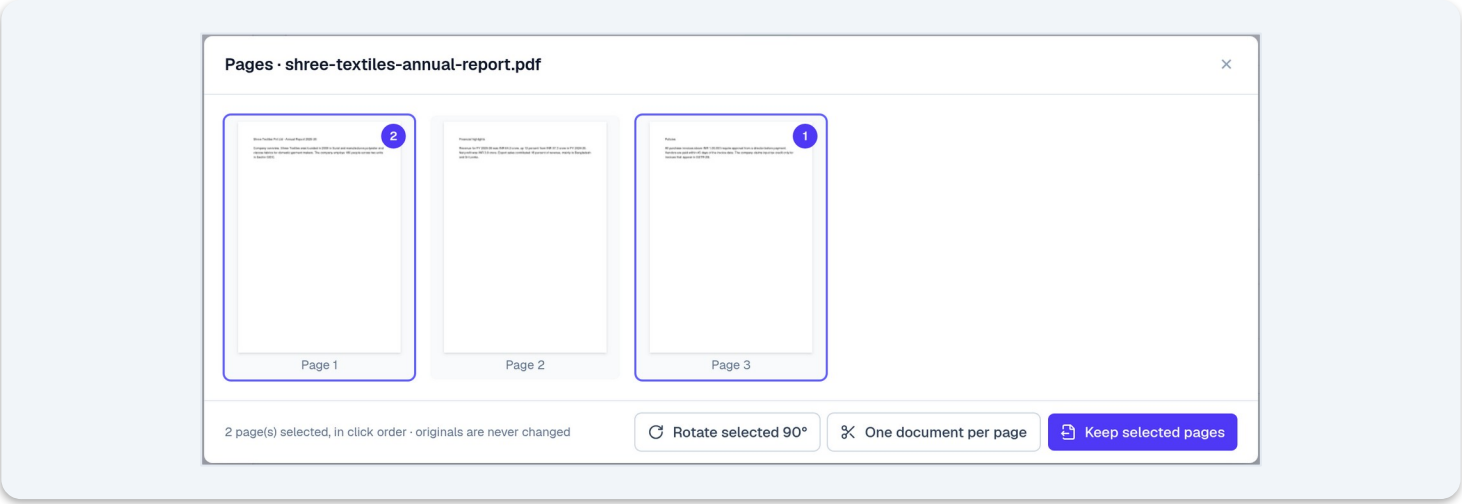

Live status

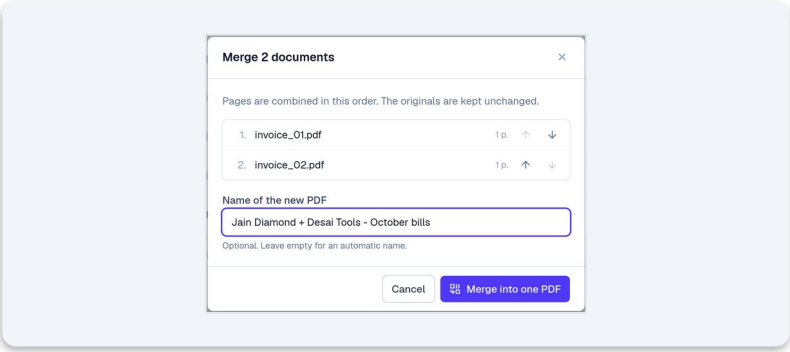

Queued → Ready, with the reason if something fails

PDF TOOLS

Merge, split, keep pages, rotate

Your team never needs another PDF tool. Originals never change.

One document per page
A vendor's 20-invoice PDF → 20 invoices

Keep selected pages
Drop covers, blanks and T&C pages

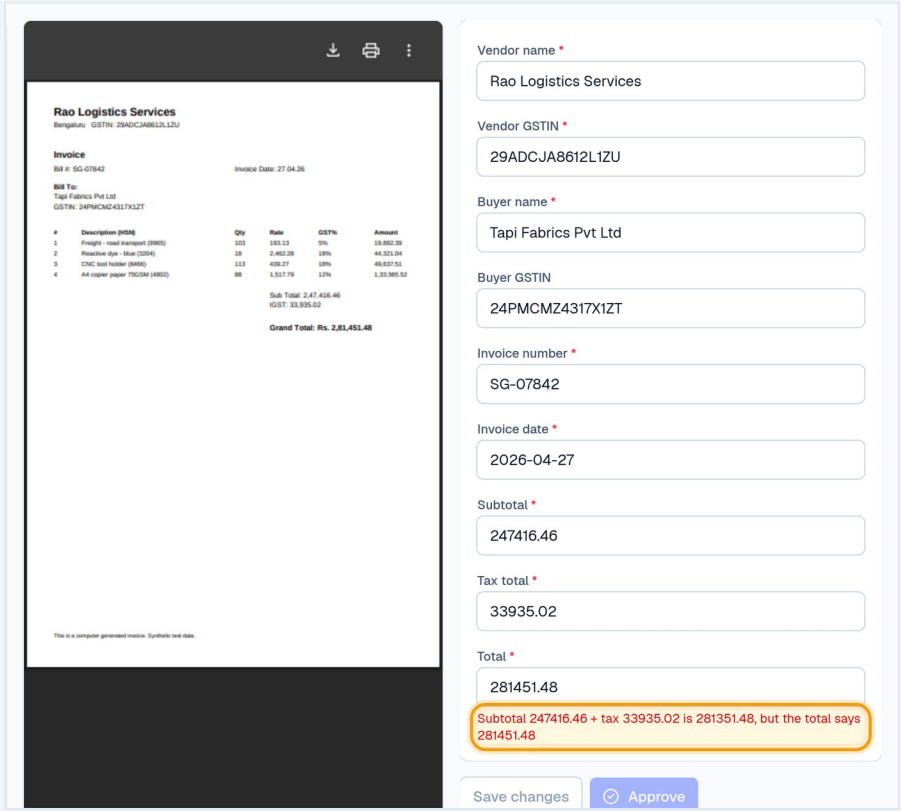

Merge in any order
Bills that belong together

Rotate
Fix sideways scans

CHECKS

A wrong total, caught before it reaches the books

invoice_05: the numbers on the bill don't add up.

Totals checked
subtotal + tax must equal the total

GSTINs checked
format and check digit catch OCR slips

Round-off understood
₹1 rounding is a note, not an error

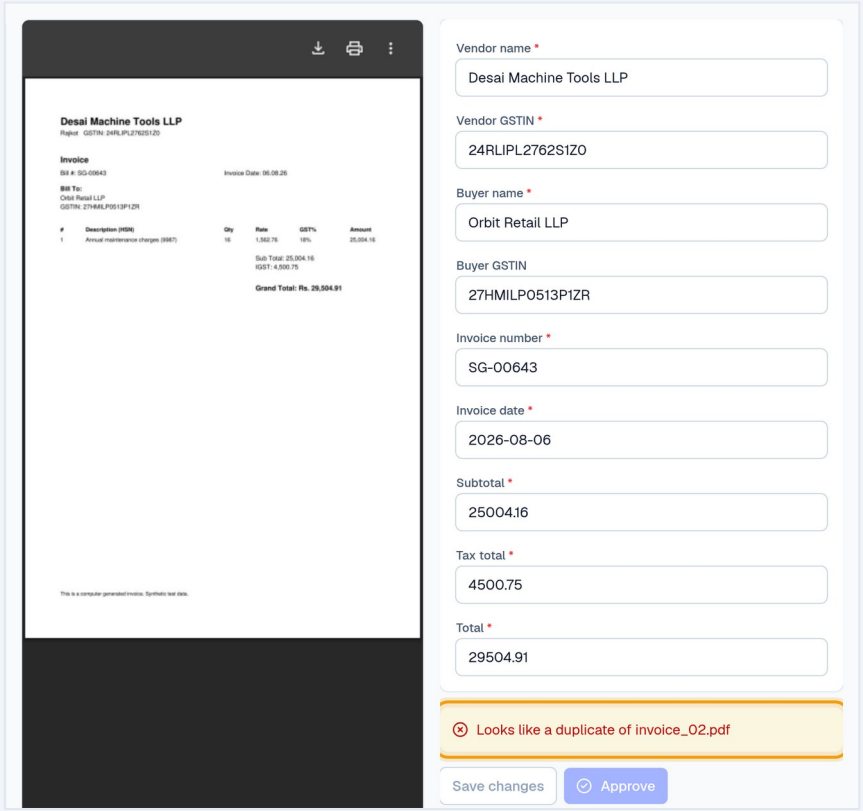

₹100 difference

Subtotal + tax = 2,81,351.48 but the bill says 2,81,451.48.

DUPLICATES

The same bill twice? Caught, even as a photo

The client sent invoice_02 as a PDF and again on WhatsApp.

Same vendor GSTIN + invoice no.
= duplicate

Works across PDFs and photos

Blocks approval
until someone decides

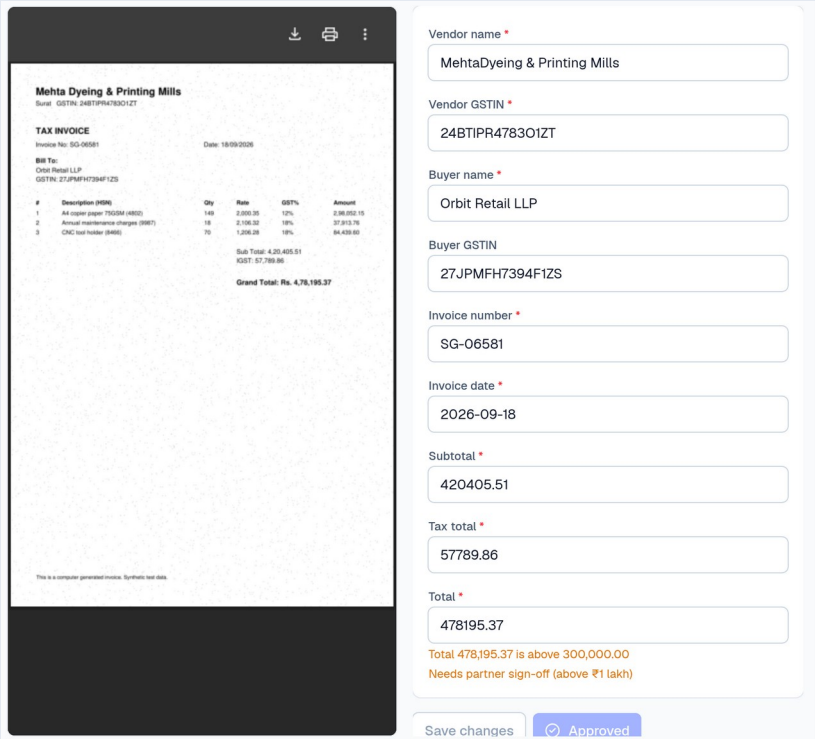

Credit claimed twice

Duplicates are the costliest mistake to find late.

APPROVE & EXPORT

Fix, approve, export clean data

invoice_03 was a scan: fix anything misread, approve, then export.

THE EXCEL YOU GET (APPROVED INVOICES ONLY)

Vendor	Vendor GSTIN	Invoice no.	Date	Tax	Total
Mehta Dyeing & Printing Mills	24BTIPR4783O1ZT	SG-06581	18-Sep-2026	57,789.86	4,78,195.37

Approve only when there are no errors
warnings are allowed; errors block

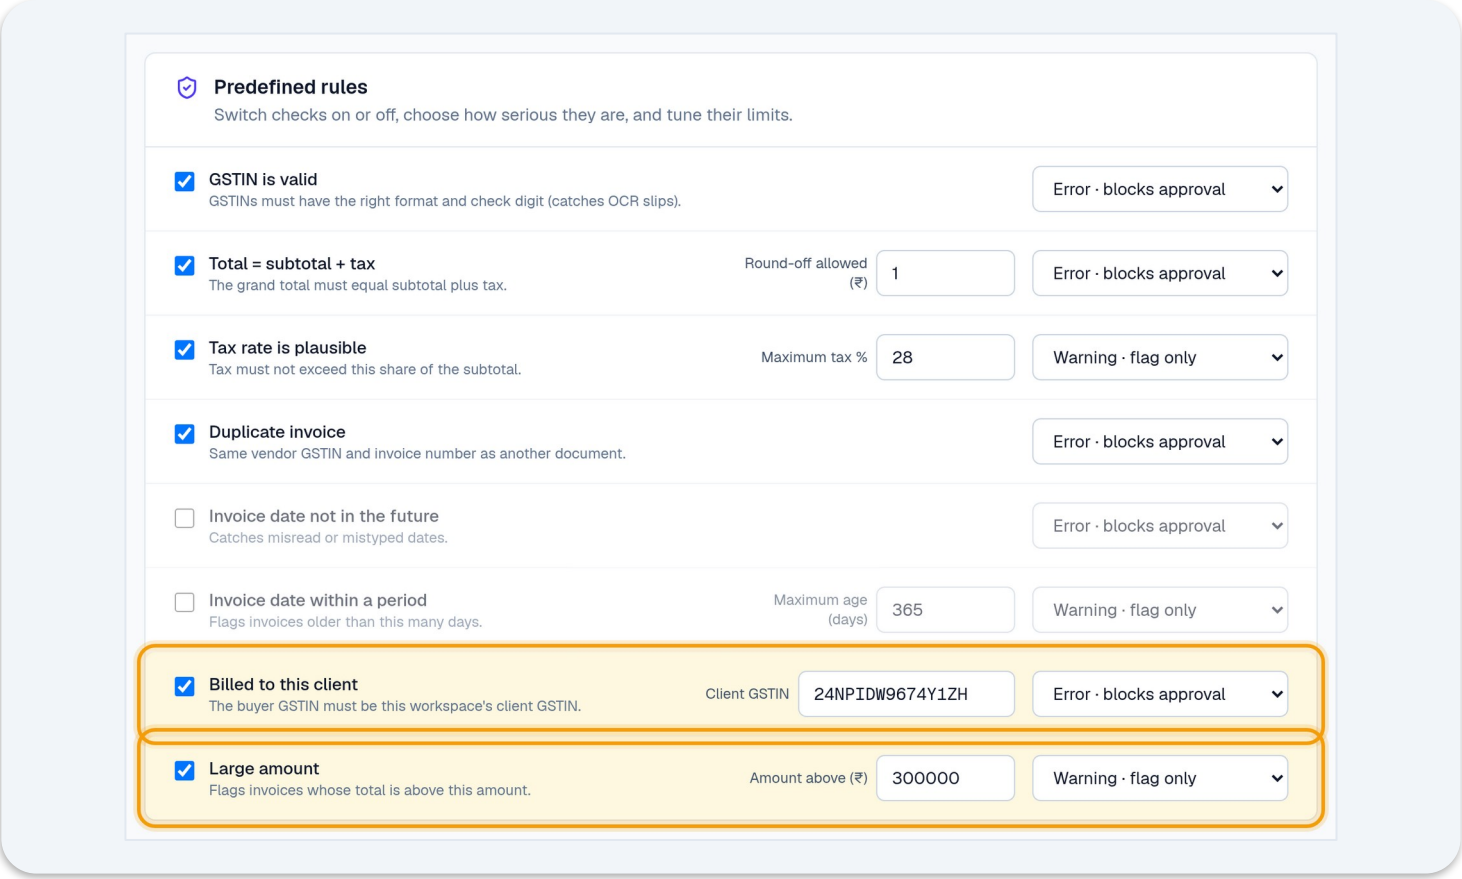

Every correction recorded
who changed which figure, old → new

Real numbers and dates
sum and sort straight away in Excel; Tally export next

YOUR RULES

Your checks, set per client

Switch on what matters for this client; choose Error or Warning.

Billed to this client
flags bills addressed to another GSTIN

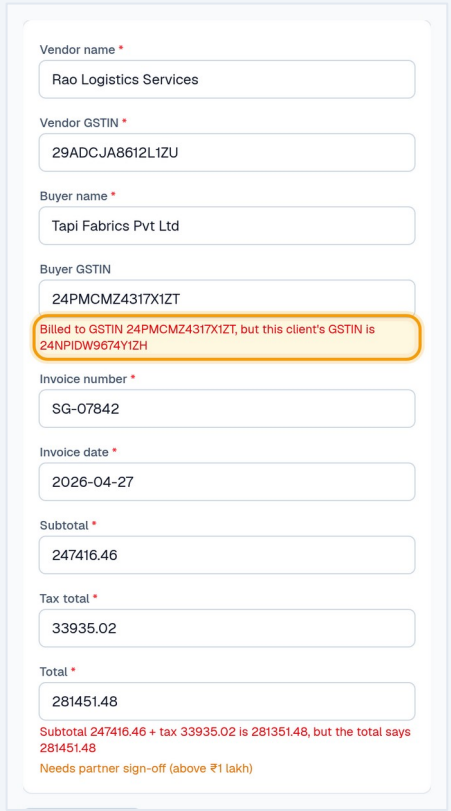

Large amount
your threshold, per client

Error or warning
errors block approval; warnings only flag

WRONG CLIENT GSTIN

Right name, wrong GSTIN? Flagged.

invoice_05 says 'Tapi Fabrics Pvt Ltd' but carries a different GSTIN.

Input credit needs the right GSTIN
a matching name isn't enough

Bills meant for other clients
are flagged too

Re-checked instantly
when you change the rules

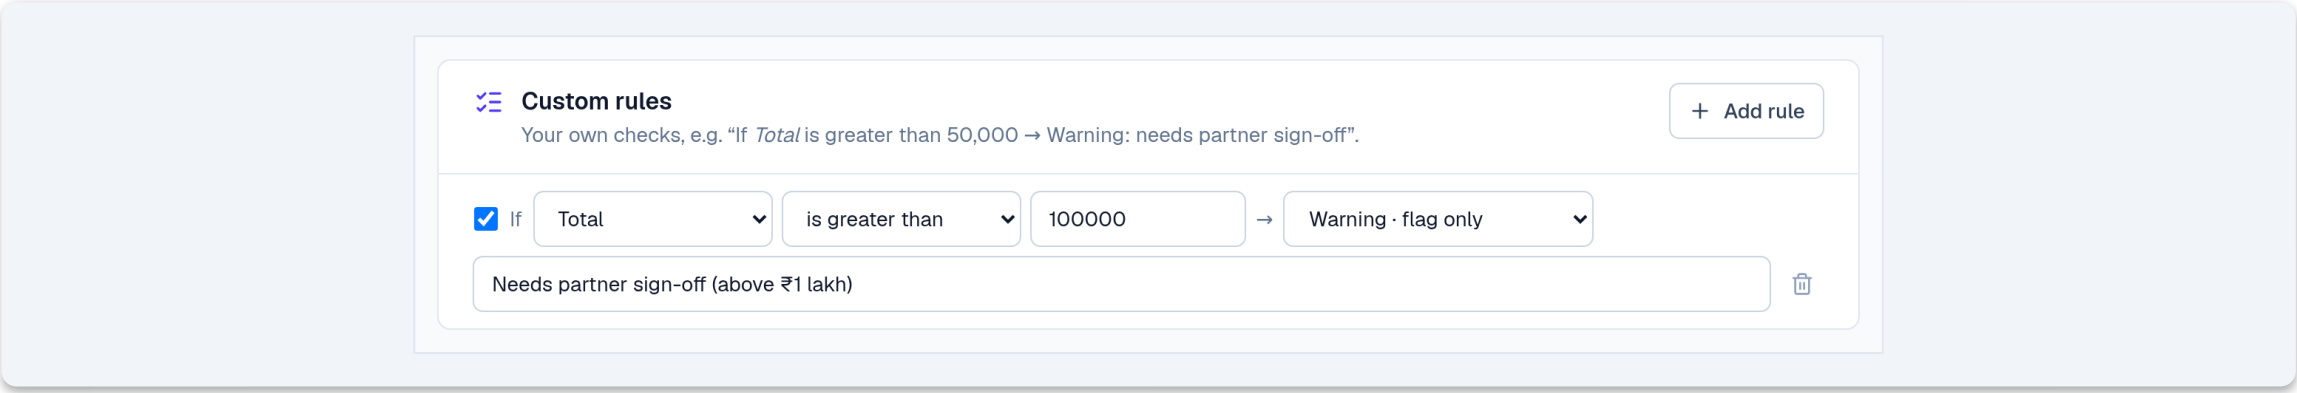

ITC at risk

Credit is claimable only when the bill carries the client's GSTIN.

CUSTOM RULES

Add your own rules, no code

If [field] [condition] [value] → Error or Warning, with your own message.

Partner sign-off

If Total is greater than 1,00,000 → Warning

ITC needs buyer GSTIN

If Buyer GSTIN is empty → Error

Old bills

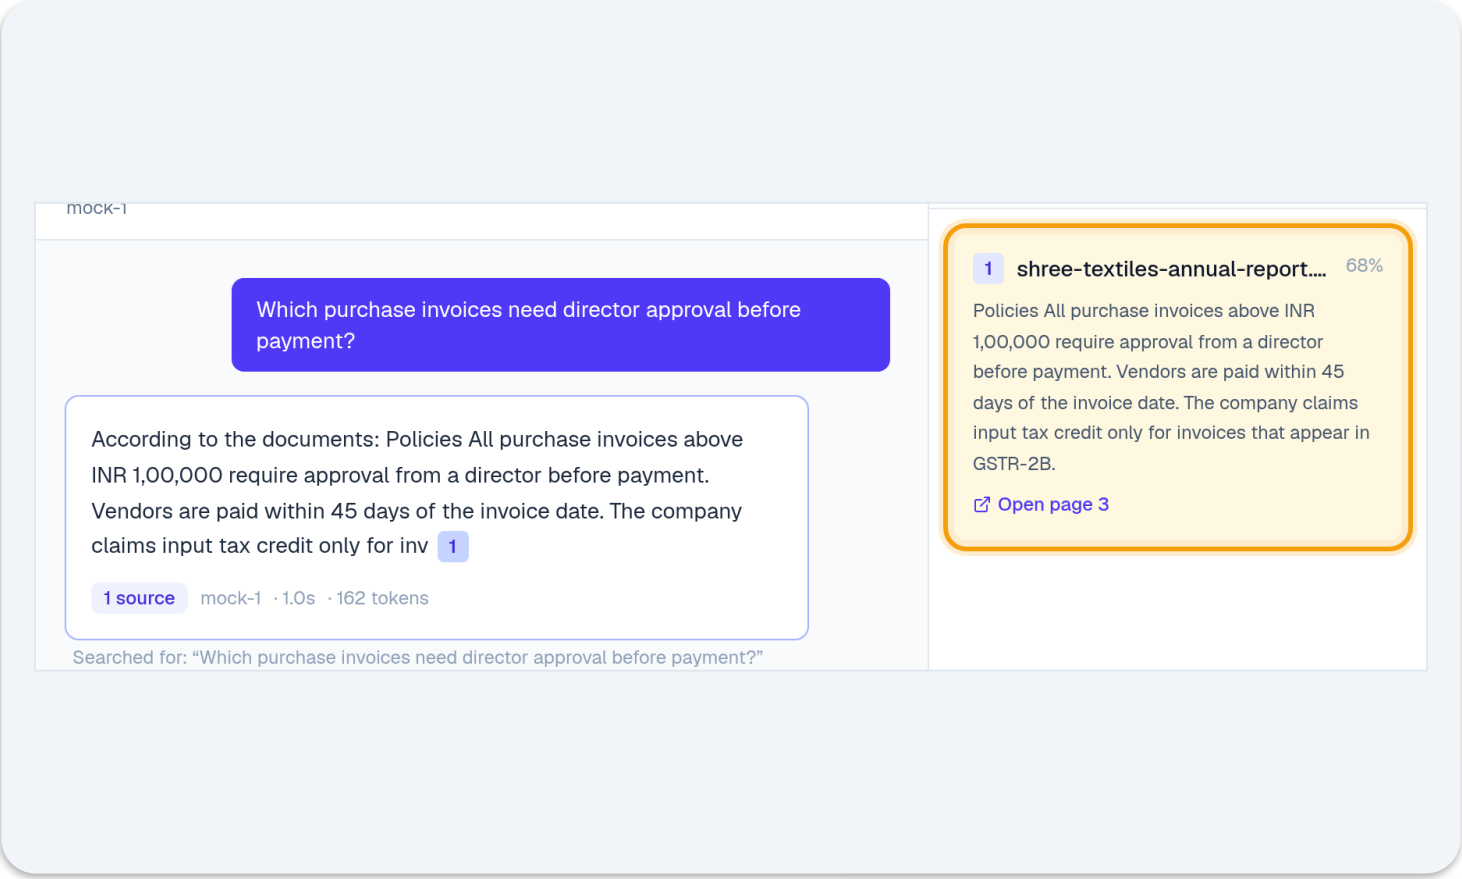

If Invoice date is before 01-04-2026 → Warning

Ask: what's one check your seniors always do? Let's add it now.

RESEARCH

Ask the documents, see the exact page

Answers only from the client's documents, with the source page.

Plain-language questions
e.g. which invoices need director approval?

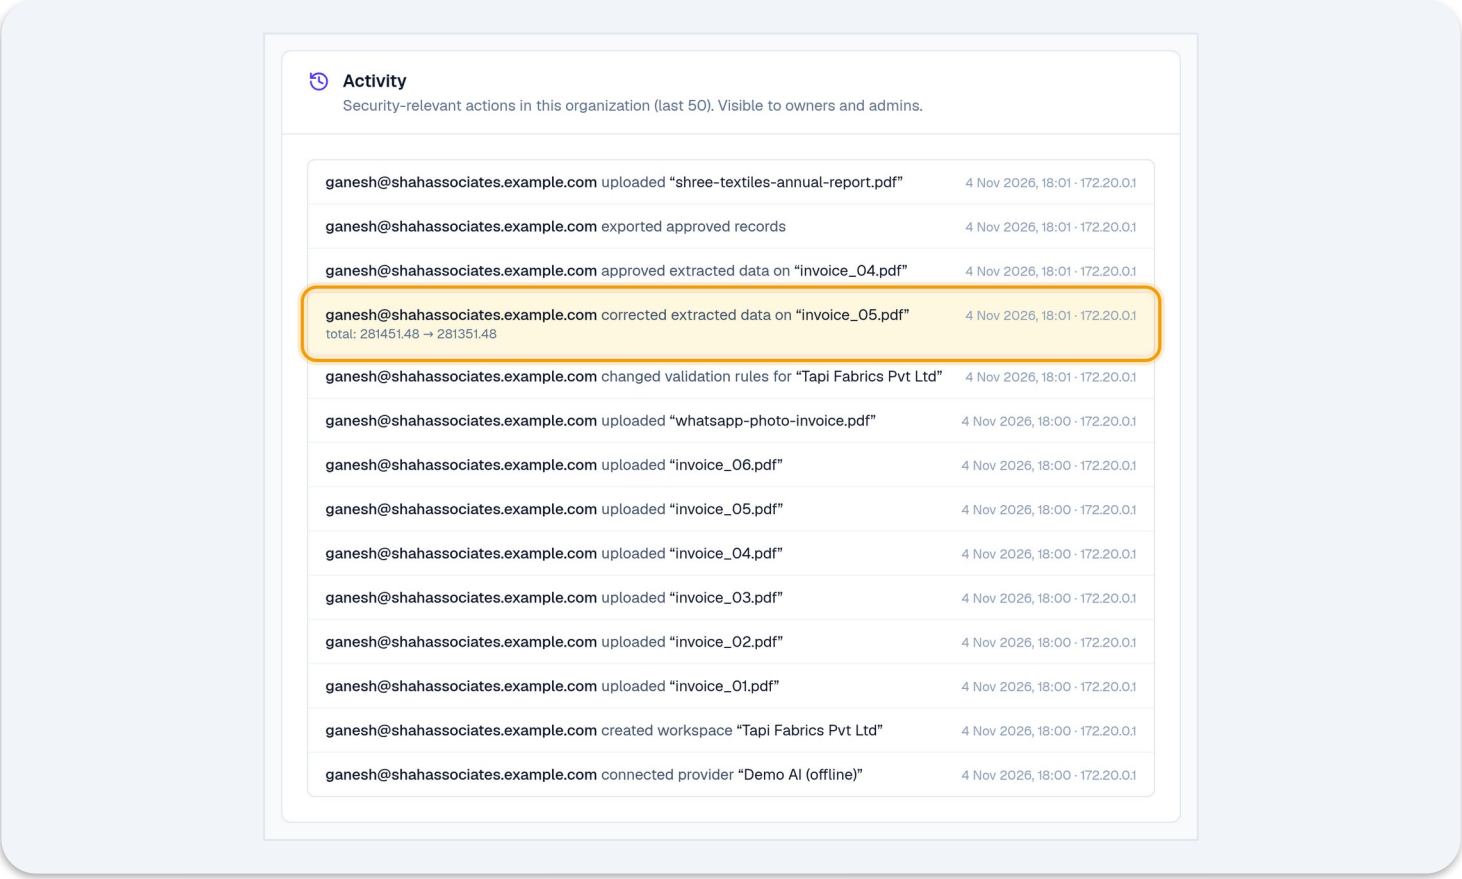

Source and page shown
click to open the page

Says 'not found'
instead of guessing

TRUST

Your clients' data stays under control

Every action is recorded, including who changed which figure.

Each client and firm fully separated
tested on every page of the app

Roles
owner, admin, member

Activity log
logins, uploads, corrections, approvals, exports

NEXT, WITH YOU

What we're building next

You decide the order. Which saves your office the most time?

1	**Tax breakdown**	Line items, HSN, CGST / SGST / IGST, rate checks, intra- vs inter-state check
2	**Tally export**	Tally-importable vouchers, ledger mapping remembered per client
3	**GSTR-2B reconciliation**	Matched · amount differs · missing in 2B (credit at risk) · missing in books
4	**Collect bills faster**	WhatsApp / email inbox, monthly checklist per client, automatic reminders

FOUNDING-FIRM PILOT

Try it on your own invoices

Two weeks. Your data. A clear measure of success.

Duration	2 weeks
Scope	Your real purchase invoices, up to 300
We do	Set up your clients, rules and team; support in person in Surat
Success	90–95%+ of fields correct on readable invoices, and less time per invoice than today
You give	Weekly feedback, and a testimonial if it works
Price	No charge for founding firms

FIRST STEP

Share 50–100 of last month's purchase bills. We'll show you the results on your own data.

Thank you

Let's try it on your own invoices.
